

HiPP Bio Combiotic Stage 2 Organic Follow-on Infant Milk Formula (600g)

Age: 6+ Months

PREPARATION

Preparation for all powdered formulas (also consistent with United States, FDA guidelines):

1. Boil water freshly before each meal and allow to cool down to about 50°C (122° F) before mixing with formula.
2. Fill the clean and sterilized bottle with about half of the desired amount of water (see feeding chart below).
3. Fill the measuring scoop loose and level it with the back of a knife (note that scoop sizes vary by brand and even by stage).
4. Add the correct number of leveled scoops of powder (1 leveled scoop of powder per 1oz / 30ml of water).
5. Close the bottle and shake thoroughly. Add remaining water and shake well again.
6. Allow to cool down to approximately 37 °C (98.6° F) before feeding.

TIPS:

- ✓ Once you have opened the inner foil bag containing your formula, you should use it within 2 to 3 weeks.
- ✓ Avoid storing in an area of high heat or humidity.
- ✓ If the mixed formula is not consumed within an hour, you should discard it.
- ✓ Do not heat feeds in a microwave, hot spots may occur which could cause scalding.
- ✓ Please observe the preparation instructions and the dosage ratio exactly so that your baby always gets the nutrients it needs.
- ✓ Take care of the dental care from the very first tooth on and do not leave the bottle with your child to avoid continuous sucking.
